

## **What's New?**

### ***Solar Projects:***

- Burlington is dedicated to reducing barriers to successful implementation of solar installations for residential and commercial solar customers therefore, as of November 14, 2012 the City of Burlington has for one year waived all building, electrical, plumbing, and zoning permit fees associated with the installation of solar photo-voltaic panels and thermal hot water equipment.
- For information on how to get started with your solar project and for a list of approved solar installers visit the web site of Renewable Energy Vermont (REV). Click [here](#) for REV's web site.

### ***Smoke and Carbon Monoxide Detection:***

- We have a newly revised guideline for the installation of smoke and CO detection. Click on the link to go to the [City of Burlington Hardwired Smoke and Carbon Monoxide Detection Installation Guidelines](#)
